year-on-year to 6.0% in H1 2018

“Having closed the deal to purchase Eldorado in April 2018, M.Video nevertheless showed stable growth in both operational and financial figures, and the growth of certain indicators compared to Eldorado’s last year’s results has been several times higher. The company’s pro-forma gross profit has risen by 24%, EBITDA has increased almost three times, and EBITDA margin has reached a record high of 6%. The financial results demonstrate that a merger of the companies has been a well-weighted and proper step in terms of both perspective return on capital and the interests of customers wishing to obtain access to a wide range of high-quality and affordable electronic appliances”, - noted M.Video-Eldorado Group President Alexander Tynkovan.

“Forecasts and plans are being successfully translated into reality. This is largely due to the efforts of the teams of both companies now working together within the same group. Over a brief period they managed to completely revise and reshape all the essential functions, optimize all the business processes, and attain the planned results concerning sales and profitability. A strategy based on the preservation of the two brands and a merger of the back-office functions has proven effective. Despite the integration, M.Video has kept its growth rates, while Eldorado has shown a rise in all the key indicators following the renovation of its business model. The M.Video-Eldorado Group has attained the principal synergies worth 2.3 billion rubles, and the company is confirming the full volume of synergies totaling 18 billion rubles by 2022”, - emphasized Enrique Fernandez, CEO of the Group.
